The Coastal's Chest Freezer comes with No Defrost Cycles - Saves energy and maintains product integrity and quality Indoors or Outdoors - Freezer maintains a constant -10F to -20F temperature, and will keep frozen bait products cold without power for 12 + hours before temperatures reach unsafe levels inside the freezer. There are no moving parts for increased reliability !

And with its guaranteed product delivery, the machine will automatically refund the customer's money if product does not vend for any reason. The Coastal has a nice simple menu driven interface, using a bright onboard LCD Display which shows all machine information on a single screen.

The Coastal frozen vendor is by far the most energy efficient frozen vending machine on the market. The Coastal electrical usage averages 3.1 KWhr per day, or about \$100 a year in electrical cost. Other refrigerated food machines and frozen glass front technology use up to almost five times more electricity – that's \$350 to \$400 more electrical cost for your location!
